Regarding the "List of Related Cases" submitted, it is noted that the applications have been considered.

Allowable Subject Matter

2. Claims 1 and 3-21 are allowed.
3. The closest prior art, Betremieux et al., teaches a composite comprising a polyamide layer, a bonding layer, and a polyolefin layer, where the bonding layer comprises a mixture of polyamide with a functionalized polyolefin. However, the reference does not teach the applicant's claimed polyamide copolymer to be used in the adhesive layer. It is the examiner's position that the use of the specified polyamine-polyamide copolymer in the applicant's claimed bonding agent and composite structure provides a novel and unobvious step over the prior art.
